PROJECTS

- ***AI Virtual Assistant Chatbot***

  The Project includes creating a chatbot using python. Bard AI was also integrated by using browser cookies. PyQT5 GUI to make the UI of the Project, also various Packages and Libraries such as "speech_recognition", "pyautogui", "geolocation" were used.

- ***Staff Management System***

  Currently working on the Staff Management System of NED University. It will be a full stack web application with an integration of huge amount of database of university's staff. By the project, my role is to create robust Front End collectively with the integration of Back End.

- **Prompt Suggestion Web App**

  Prompt Hub is a full-stack web application built with Next.js, featuring MongoDB and Mongoose for data storage. It uses Tailwind for UI design and NEXT Auth for user authentication and authorization. Key functionalities include creating, editing, and deleting prompts, along with tagging and searching prompts by tag and username. Users can also create and manage their profiles.

- ***Shopping Cart Web App***

  Crafted a Shopping Cart Web application using React.js which encapsulates the standard functionality of digital Shopping carts such as Add to Cart, Increment and Decrement of Items, Payment Calculations e.t.c.
